

From yesterday's "Standard":

It is reported that Dr. Hsin emjire is about to try and raise a new war loan of \$ 250,000,000. The last was not by any means a success. The new loan will have been carefully prepared with all the usual and glowing accounts of the German feats of arms. It has been sadly discredited by the recent German defeat. It is reported that the Hun empire is about to try and raise a new war loan of £ 250,000,000. The last was not by any means a success, although the country had been carefully prepared with false and glowing accounts of the German feats of arms. It has been sadly disillusioned since then, and it is certain that the new loan will have to be guaranteed by the wealthy corporations that have accumulated great fortunes by ex-

A United Press correspondent states that in his recent visits to the Belgian frontier he found that the brave little country has three armies of 100,000 men each, one in reserve, and the third composed of conscripts now completing their instruction in France. It may be taken for granted that once the Huns are driven out of Belgium there will be another 150,000 men available. The Belgians have a fearful account to settle with the savage murderers and destroyers of their kin and their country, and the sense of justice and a sacred vengeance it is most fervently to be hoped that they exact full measure pressed down and running over.

"Le Matin" and "Le Journal" just to hand, like most of the French papers, contain horrifying accounts of the atrocities which, a local Doctor declines to believe could have been committed by the Germans. "Le Journal" publishes several full pages of the report of the official committee of investigation, the reading of which is to the senses. There is no more reason for doubting this than to doubt the assassinations committed by the German navy on the east coast

In reference to these same cases Yorkshire murders we notice that the Archbishop of York has recently declared publicly, that the Emperor William is responsible for the heinous crimes of his soldiers, nor indeed for anything else objectionable as he is a paragon of kindness and sanctity. This able cleric, who has always been distinguished as a first-class parasite with a special talent for climbing to higher paid posts, unimpaired by the least sense of shame, is a special pleader of a large number of aristocratic English who would prefer to form a part of a German Empire of the world, than of the British Empire of a fourth of it. It was recognised at the

time of the raid that the Germans have a very complete intelligence system on the eastern coast, notwithstanding that all German subjects had been removed and prohibited from approaching the

Ya están ultimados los preparativos del importante corso que tendrá lugar en este punto y que comprende la Avenida San Martín desde las vías del ferrocarril Central Argentino hasta la calle Chacabuco, en cuyo espacio se han colocado dobles filas de paños artísticamente adornados.

La comisión organizadora, que no se da un minuto de descanso, ha instituí-

do premios consistentes en medallas artísticamente labradas, a distribuirse entre los mejores carros, carruajes, palcos, máscaras sueltas y comparsas que asistan al corso.

Don Benito Couto, que preside la comisión organizadora, ha sido objeto de muchas felicitaciones para él y los caballeros que lo secundan, con motivo de la actividad desplegada.

A juzgar por el entusiasmo que reina, los dos cursos de esta floreciente localidad del Norte prometen ser un gran éxito.
